SUMMARY

Certified eJPT professional and DEPI graduate with hands-on offensive security experience in web and network penetration testing. Proficient in exploitation frameworks, OWASP Top 10 assessment, and active laboratory practice on TryHackMe and Hack The Box. Equipped with a strong full-stack web development background that provides unique architectural depth to web application security testing.

CERTIFICATIONS

- **Infrastructure & Security — Vulnerability Analyst & Penetration Tester** | DEPI / Digital Egypt Pioneers Initiative Jun – Dec 2025
- **eJPT — eLearnSecurity Junior Penetration Tester** | NetRiders Academy (via INE) 2025
- **CCNA (Course Completed)** | Self-Study 2025

TECHNICAL SKILLS

- **Web Pentest:** Burp Suite, OWASP ZAP, Nikto, SQLmap, Gobuster, Dirb, ffuf, XSSStrike
- **Network Pentest:** Nmap, Netcat, Wireshark, Metasploit Framework, Hydra, enum4linux
- **Software Development:** HTML, CSS, JavaScript, React, Node.js, Express, PHP, MySQL, MongoDB, Python, C/C++, Java
- **OS & Tools:** Linux (CLI proficient), Git, GitHub, REST APIs, OOP
- **Networking:** TCP/IP, DNS, HTTP/S, OSI Model, CCNA fundamentals, Active Directory basics

EXPERIENCE & TRAINING

Penetration Testing Track — Trainee | DEPI / Digital Egypt Pioneers Initiative Jun 2025 – Dec 2025

- Completed 6-month intensive track covering web application penetration testing (OWASP Top 10) and network security, with 100+ hours of hands-on lab practice
- Identified and exploited 20+ vulnerabilities across simulated environments including SQLi, XSS, broken authentication, and privilege escalation
- Followed full pentest methodology: reconnaissance, scanning, exploitation, post-exploitation, and professional reporting

React Web Development Co-op | DEPI / Digital Egypt Pioneers Initiative 2024

- Built and deployed 3+ full-stack web applications using React, Node.js, and REST APIs over a 6-month co-op program
- Developed a deep understanding of JS behavior, API structures, and front-end logic directly applicable to web application penetration testing

Ethical Hacking Workshop — Instructor | Code Rifiers Student Activity

2024

- Delivered an Ethical Hacking workshop covering Security+ fundamentals to 20+ students, introducing offensive security concepts and tooling
- Taught C/C++ programming and OOP principles as a club instructor

PROJECTS & AWARDS

Graduation Project: AI Interview Assistant | Frontend Developer

2025 – 2026

- Led the frontend development of an AI-powered interview platform, designing and implementing a responsive UI to facilitate automated technical recruitment simulations

Second Place — MSP23 Hackathon | University Hackathon

2023

- Co-built a fully functional educational web platform (HTML, CSS, JS, PHP, MySQL) within 24 hours, securing 2nd place among competing teams

PLATFORMS & PRACTICAL LABS

PortSwigger Web Security Academy

- Solved labs across SQL Injection, XSS, CSRF, Authentication flaws, and Access Control vulnerabilities
- Platform: portswigger.net/web-security

TryHackMe & Hack The Box

- Completed 15+ machines and rooms covering web exploitation, privilege escalation, and network attacks
- TryHackMe: tryhackme.com/p/Joao1160 | HTB: app.hackthebox.com/profile/Joao116

EDUCATION

B.Sc. Computer Science & Artificial Intelligence — IT | Helwan University

Oct 2022 – Aug 2026

- Expected graduation: August 2026

LANGUAGES

Arabic: Native **English:** Proficient (B2)
